EDUCATION

Wayne State University, B.S. in Computer Science, GPA: 3.8 / 4.0 (Pending Completion) *Aug 2023 - May 2027*
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Management
Member: Society of Computer Developers, WayneHacks, Bangladeshi Student Association

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, Swift, JavaScript, C#, PHP, HTML, CSS, Bash, Dynatrace
Frameworks & Tools: React.js, Angular, Visual Studio Code, JUnit, Git, Selenium, Appium, Jenkins, Twillio, TestNG, TestKube, Xcode, Jira

WORK EXPERIENCES

United Wholesale Mortgage **Pontiac, MI**
Software Development Intern | C#, React, Selenium, Jenkins, Python, Jenkins, SQL, TestKube, Dynatrace *May 2026 - Aug 2026*
- Developed a centralized dashboard to track and display automated test results from Jenkins and TestKube, giving the development team one place to monitor test activity.
- Integrated Jenkins and TestKube APIs to collect test results and display the type of test, display build status, execution times, and failure data. Introduced charts, filters, and test history to enable developers to easily spot frequent failures and flaky tests.
- Used SQL and database optimization to improve how test data was stored and retrieved, reducing unnecessary database processing.
- Optimized database and infrastructure usage to reduce resource consumption, saving the company around $50K per month.

Target **Minneapolis, MN**
Software Engineering Intern | Java, JUnit, Selenium, Appium, Jenkins, SQL, Bash, Halo *Jun 2025 - Oct 2025*
- Created interactive training and simulation games for fulfillment center staff in Unity and Java to enable employees to practice basic warehouse processes in a virtual world.
- Built automated testing tools using Junit, Selenium, and Appium to test game functionality and internal applications across different types of devices.
- Utilized SQL to manipulate employee training data, monitor game performance, completion and test results.
- Created bash scripts and Jenkins pipelines to automate builds, test and deployment of new versions of training games.
- Collaborated with engineering and ops teams to troubleshoot issues, enhance features, and deploy updates according to employee feedback.

T-Mobile **Troy, MI**
Retail Sales Manager *Aug 2022 – Jun 2024*
- Lead a team of 8+ associates, driving sales performance, exceeding monthly sales target, and customer satisfaction goals.
- Oversaw daily operations, inventory control, and compliance while adapting to evolving customer needs in a fast-paced retail environment.
- Managed hiring, training, and performance reviews, ensuring teams alignment with corporate sales goals.

PROJECTS

LUMA Startathon – Startup Pitch Participant | Python, CSS, C++, Jupyter Notebook, Streamlit *Oct 2024*
- Developed a prototype of an alternative to the conventional restaurant POS system that is less expensive and focused more on ordering and checkout capabilities.
- Created backend logic in Python and C++ for menu handling, item selection, and calculating totals.
- Developed a front-end in Streamlit that enables users to choose items, see totals, and simulate checkout.
- Brought an idea to a demo-level product and was able to present the main features and functionality in a concise pitch.

Portfolio Website | HTML, CSS, JavaScript, GIT *Sep 2023*
- Created and built a personal portfolio site to present projects and skills that are responsive in nature.
- Applied interactive functionality and animation with JavaScript and CSS.
- Used Git as a version control, project management.
- Devoted to clean UI/UX design principles of the user experience.
